

Lapham Peak 2017 Butterfly Garden Report

This summer, 81 new plants have been planted, and an estimated 12 - 18 more, plus spring bulbs, will be planted before the end of the season.

As planned a year ago, grass and weeds were dug out in two areas of the garden in May. (See below.) One was about 5' x 10', and the other one was approximately 12' x 15'. The filling of these areas with plants was begun. Prior to this summer, there were no flowering plants there.

Thank you

Elizabeth Sternkopf
