

Butterfly Garden Report 2018

May - Meadow Rose

September - Meadow Rose Hips and
Asters

2018 was a good year for the garden as we continued to build on the positive changes and plant additions of the past few seasons, none of which would have been possible without the financial generosity of the Kettle Moraine Garden Club. 78 new native prairie plants were added to the garden this season. In addition, bulbs will be planted shortly for another 75+ spring flowers, which will bloom before the native plants appear.

The brick pathway that is being constructed bit by bit as funds become available saw some more personalized bricks laid this season. The walkway now extends about a third of the way around the garden and is really attractive. I encourage everyone to purchase a brick to aid in the endeavor to complete the pathway.

A new sign acknowledging the support of the Kettle Moraine Garden Club was installed outside the gate.
