

HAUSMANN NATURE CENTER

The Center was open in September and October. Attendance was very low as was traffic in the Park due to the weather conditions. In October the number of visitors really increased as the leaves changed and weather conditions improved.

A big thank you to the volunteer hosts and also to Jim Waltz who always responds when something needs repair or replacement.

Also thanks to Park staff who took care to move the exhibits to avoid disruption or damage when area had to be cleared for another purpose.
